

## Math 173 – Quiz #2

February 5, 2016

Instructor: Patricia Wrean

Name: \_\_\_\_\_

Total: 40 points

---

1. For  $f(x) = x^2 - 1$  and  $g(x) = \frac{4}{\sqrt{x}}$ , find  $(f \circ g)(x)$  and  $(g \circ f)(x)$ . (4 points)

\_\_\_\_\_

\_\_\_\_\_

2. Rewrite the equation of the following parabola in the form  $f(x) = a(x-h)^2 + k$  by **completing the square** and state the equation of the axis of symmetry and the coordinates of the vertex. Is the vertex at the maximum or minimum point in the parabola (circle one)? (6 points)

$$f(x) = 2x^2 - 12x + 23$$

equation: \_\_\_\_\_

vertex: \_\_\_\_\_

axis of symmetry: \_\_\_\_\_

maximum / minimum

3. Write the equation for the function given in the graph below. (The graph hasn't been stretched, just shifted and reflected.) (3 points)

4. Is the function  $f(x)$  even, odd, or neither? Show your work. (2 points)

$$f(x) = x^3 \sqrt{1-x^2}$$

\_\_\_\_\_

5. Factor the following polynomial into linear factors. Then state the zeros of this function and their multiplicities. (5 points)

$$f(x) = x^3 + 3x^2 + 7x + 5$$

\_\_\_\_\_

\_\_\_\_\_

6. Consider the following rational function: (10 points)

$$f(x) = \frac{x-1}{x^2-2x-3} = \frac{x-1}{(x+1)(x-3)}$$

- a) What is the y-intercept?
- b) What are the x-intercepts?
- c) Are there any vertical asymptotes? If so, where?
- d) Are there any horizontal asymptotes? If so, where?
- e) Are there any oblique/slant asymptotes? If so, where?
- f) Sketch the graph as accurately as possible.

extra points:

$x$	$y$
-2	$-\frac{3}{5}$
2	$-\frac{1}{3}$
4	$\frac{3}{5}$

7. Use the Rational Zeros Theorem to list all possible rational zeros of  $f(x)$ . (2 points)

$$f(x) = 4x^5 - 2x^4 + 5x + 2 \quad \underline{\hspace{10em}}$$

8. Using Descartes' Rule, how many positive real zeros and negative real zeros can the following polynomial have? Do not solve it! (2 points)

$$f(x) = -3x^5 + x^3 - 9$$

positive real zeros: \_\_\_\_\_  
negative real zeros: \_\_\_\_\_

9. The sum of the base and the height of a triangle is 20 cm. Find the maximum area for this triangle, and also state the dimensions of the triangle which give this maximum area. (6 points)
