

**School of Arts & Science
MATHEMATICS DEPARTMENT**

**MATH 189-X01
Math for Civil/Mech 3
2015 Q3**

COURSE OUTLINE

The Approved Course Description is available on the web @

<http://camosun.ca/learn/calendar/current/web/math.html#MATH189>

Ω Please note: this outline will be electronically stored for five (5) years only.
It is strongly recommended students keep this outline for your records.

1. Instructor Information

(a)	Instructor:	Patricia Wrean (Pat)		
(b)	Office Hours:	Posted on office door and website		
(c)	Location:	CBA 153		
(d)	Phone:	(250) 370-4542	Alternative Phone:	
(e)	Email:	wrean@camosun.bc.ca		
(f)	Website:	http://wrean.disted.camosun.bc.ca/math189/		

2. Intended Learning Outcomes

(No changes are to be made to this section, unless the Approved Course Description has been forwarded through EDCO for approval.)

Upon completion of this course a student will be able to:

1. Solve separable and linear first-order differential equations.
2. Use the numerical methods of Euler and Runge-Kutta to find approximate solutions to first-order differential questions.
3. Solve second-order linear homogeneous and non-homogeneous differential equations with constant coefficients.
4. Solve application problems involving first and second-order differential equations, including mass-spring systems.
5. Calculate probabilities using the following: basic properties, simple events, counting techniques, conditional probability, independence, and Bayes' theorem.
6. Graph a data set using a variety of presentations. Calculate the mean, median, and standard deviation of a data set and interpret the results.
7. Solve problems involving discrete probability distributions such as binomial, Poisson, and hyper-geometric, and continuous probability distributions such as the normal distribution. Calculate point estimates and confidence intervals for both large and small samples.
8. For a bivariate data set, calculate the linear regression line using the method of least squares, either using a scientific calculator or using appropriate software (Excel, Matlab, etc.). Calculate and interpret the coefficients of correlation and determination.

3. Required Materials

- (a) Text: Allyn J. Washington, Basic Technical Mathematics with Calculus, SI version, 10th edition, Pearson Education Canada. (Previous editions are also acceptable.)
- (b) Calculator: Only regular scientific calculator (non-programmable, non-graphing) will be permitted for quizzes and exams. The use of other electronic devices such as cell phones, MP3 players, iPods, electronic translators, etc., during exams is not allowed.

4. Course Content and Schedule

Chapter 31: Differential Equations

from Washington, Basic Technical Mathematics with Calculus

- 31.1 Solutions of Differential Equations
- 31.2 Separation of Variables
- 31.3 Integrating Combinations
- 31.4 The Linear Differential Equation of the First Order
- 31.5 Numerical Solutions of First-Order Equations
- 31.6 Elementary Applications
- 31.7 Higher-Order Homogeneous Equations
- 31.8 Auxiliary Equations with Repeated or Complex Roots
- 31.9 Solutions of Nonhomogeneous Equations
- 31.10 Applications of Higher-Order Equations

Statistics

- 1 Introduction
- 2 Probability
- 3 Discrete Random Variables
- 4 Continuous Random Variables and Their Probability Distributions
- 5 Sampling Distributions
- 6 Estimation and Sample Size Determination: One Population
- 7 Regression and Correlation

5. Basis of Student Assessment (Weighting)

The final grade will be calculated according to the following breakdown:

Tests:	40%
Assignments:	10%
Final Exam:	50%

If your final exam grade is higher than your term grade and your term work is **50% or higher**, then your final exam grade will count as 100% of your final grade.

Final Exam: The final exam will cover the entire course and will be 3 hours long. As stated in the current college calendar, “students are expected to write tests and final examinations at the scheduled time and place.” Exceptions will only be considered due to **emergency** circumstances as outlined in the calendar. Holidays or scheduled flights are not considered to be emergencies.

Tests: There will be three term tests. If a student is absent for one of these tests for any reason, the student will write a make-up test on the last day of classes. If more than one test, including the make-up test, is missed for documented excuses, the weight of the missed tests will be transferred to the final exam.

Students who write all three tests may rewrite one of the three on the last day instead, but with the following two conditions: the student must notify the instructor verbally or by email at least 3 days in advance of their intention to write, and the mark from the rewrite test will replace the original mark **whether or not the new mark is better than the old one** (though students may elect to not have the rewrite test marked if they wish to keep the old mark instead).

Assignments: The lowest assignment grade will be dropped when calculating the average of your assignments. This allows a student to miss any one assignment for any reason, including illness, without penalty.

Late Policy: Assignments that are late will be given a 25% penalty if the solutions have not yet been posted to the course website. Once the solutions have been posted, late assignments will not be accepted.

Collaboration Policy: Student are encouraged to collaborate (work together) on assignments. However, you must be prepared to answer similar questions on your own for the quizzes, so it is vital that you yourself understand all of the assigned questions and work that you turn in.

6. Grading System

(No changes are to be made to this section, unless the Approved Course Description has been forwarded through EDCO for approval.)

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	A		8
80-84	A-		7
77-79	B+		6
73-76	B		5
70-72	B-		4
65-69	C+		3
60-64	C		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at camosun.ca for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	<i>Incomplete:</i> A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	<i>In progress:</i> A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. (For these courses a final grade will be assigned to either the 3 rd course attempt or at the point of course completion.)
CW	<i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services or the College web site at camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services and on the College web site in the Policy Section.

Math Room:

Technologies Centre (TEC) 142 (phone: 370-4492): This drop-in centre is freely available for your use to work on math homework and to seek help from the tutor on staff (see hours posted on door).
